Cincinnati Public School Bus Routing (Initial Questionnaire)

Shuai Wang (wang.172@wright.edu)

09/05/2019

Schools

1. Single school routing or multi schools sharing routing

Road environment

Which following best describe the routing environment?

1. urban
2. rural
3. both

Students load type

1. Mixed loads allowed (if students from different school are allowed to share bus)
2. Mixed loads not allowed

Fleet mix

1. Homogeneous (size?)
2. Heterogeneous

Objective

☐ Number of buses used
☐ Total bus travel distance or time
☐ Total student riding distance or time

- ☐ Total student walking distance
- ☐ Maximum route length
- ☐ Shared bus stop
- ☐ Capacity utilization
- ☐ Total Cost
- ☐ Number of stops

Constraints

- ☐ Vehicle capacity
- ☐ Maximum riding time
- ☐ School time window
- ☐ Maximum walking time or distance
- ☐ Earliest pick-up time
- ☐ Minimum student number to create a route
- ☐ Maximum stops per route
- ☐ Chance of overcrowding
- ☐ Chance of being late
